

ANSARI HUZAIR

Machine Learning Engineer | Full-Stack Developer | AI Application Builder

Mumbai, India • +91 9004313869 • ansari.huzair12233@gmail.com

linkedin.com/in/ansari-huzair-787112240 • github.com/huzair12233

PROFESSIONAL SUMMARY

CS graduate with dual degrees from JNTUH (B.Tech CSE) and IIT Madras (BSc Programming & Data Science). Build end-to-end AI-powered applications and full-stack platforms, with 6+ shipped projects including live client deployments. Proficient in Python, FastAPI, React, and modern ML/LLM workflows; skilled at leveraging AI tools to accelerate development. Seeking ML/AI Engineer or Software Engineer roles to deliver real-world impact.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript (familiar), Java, C++, SQL

ML & AI: Scikit-learn, YOLOv8, GroundingDINO, OCR, SDV, Google Gemini API, LLM Integration, Prompt Engineering, Computer Vision

Backend & Frontend: FastAPI, Flask, Node.js, Express.js, REST APIs, JWT | React.js, Next.js, HTML5, CSS3, Tailwind CSS

Databases & Tools: MongoDB, MySQL, SQLAlchemy, Firebase | Git, GitHub, Vercel, Postman, VS Code, Jupyter

AI-Assisted Dev: Skilled at using LLM agents (Claude, GPT, Copilot) for rapid prototyping, debugging, and workflow automation

EDUCATION

B.Tech, Computer Science & Engineering

Aug 2022 – 2025

JNTU Hyderabad | CGPA: 7.0 / 10

BSc, Programming and Data Science

Jan 2023 – 2025

Indian Institute of Technology, Madras (IIT Madras) | CGPA: 7.31 / 10

KEY PROJECTS

SmartSynth — AI-Powered Synthetic Data Generator

May – Jun 2025

Stack: FastAPI, React, MongoDB, SDV, Google Gemini API, JWT | [GitHub](#)

- Architected a full-stack platform generating structured tabular data (via SDV) and unstructured text data (via Google Gemini) for ML training pipelines.
- Implemented JWT auth, user dashboards, and multi-format export (CSV, JSON, Excel) with persistent history backed by MongoDB.

Automated Grading System — AI Exam Evaluator

Apr – May 2025

Stack: Python, OCR, Computer Vision, LLM API, Flask, React | [GitHub](#)

- Built an end-to-end grading platform extracting handwritten answers via OCR and evaluating them with LLM-based semantic comparison.
- Designed a collapsible dashboard displaying per-student grading, OCR output, AI evaluations, and final scores.

Emergency Vehicle Detection — Computer Vision Pipeline

Jan – Feb 2025

Stack: Python, YOLOv8, GroundingDINO, OpenCV | [GitHub](#)

- Developed a real-time detection pipeline identifying emergency vehicles in video streams using YOLOv8 + zero-shot detection with GroundingDINO.

Academia — MERN E-Learning Platform

Aug – Oct 2023

Stack: MongoDB, Express, React, Node.js, Firebase, JWT | [GitHub](#)

- Built a full-stack e-learning platform with real-time assignment grading, JWT auth, role-based access, and Firebase media storage.

FREELANCE & CLIENT WORK

Al-Qalam School — Official School Website (Live)

2025

Stack: JavaScript, React, Vercel | alqalamieschool.com

- Designed, developed, and deployed the official website for Al-Qalam School, currently live and serving real visitors, staff, and prospective students.

AA Associate — Business Website (Live)

2025

Stack: JavaScript, React, Vercel | aaassociate.vercel.app

- Built and deployed a responsive business website for a client, handling design, frontend development, and Vercel deployment end-to-end.

Freelance — Aviation Inventory System (Dubai Client)

Mar – Apr 2024

- Delivered an Excel-based inventory management system for an aviation parts supplier, automating stock tracking with formula-driven logic.

CERTIFICATIONS & LANGUAGES

Certifications: IIT Madras Foundation — Programming & Data Science (2024) • IIT Kanpur — Python Programming (2021) • Full Stack Web Development (2021)

Languages: English, Hindi, Urdu, Marathi — Full Professional Proficiency
